

Dear valued customer,

November 1st, 2021

Fuji Electric Co., Ltd.

Overseas Business Operation Dept.

Factory Automation Division

**[FA Component Products]**  
**Compliance to the European REACH Regulation**

Regulation (EC) No 1907/2006 of the European Parliament and of the Council of December 18, 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH)

The European REACH Regulation is a "law for the high-level protection of human health and the environment, while enhancing competition and innovation and ensuring the free movement of substances, which are contained in mixtures and articles, with the intent of achieving a production and use of chemical substances that minimize significant hazardous effects on human health and the environment".

This regulation stipulates substances that are prohibited from being used for specific purposes (restricted substances) and substances that only be used for approved purposes (substances subject to authorization), etc. In addition, information transmission is required via supply chains with regards to specific chemical substances in articles.

In particular, substances of very high concern (SVHC) are subject to regulation when they are contained in articles with a concentration of more than 0.1% by weight.

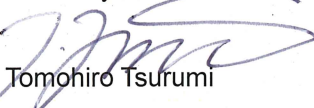

We set as the basic policy that our RoHS compliant products should be basically compliant with REACH as well, and we are working to make those products properly compliant with restricted substances and substances subject to authorization.

And with regard to SVHC, we are collecting and confirming each piece of information we receive from suppliers for the materials and parts we use, and based on this, we carry out the development of individual products.

Fuji Electric is not a manufacturer of chemicals and the company does not manufacture articles with intended release of substances. However, Fuji Electric will inform our customers in case of presence of substances in our products more than the limit allowed on the REACH Candidate List.

For more information regarding Substances of Very High Concern (SVHC) used in our FA Component products, please contact a representative at our company or one of our dealers.

Sincerely Yours

Tomohiro Tsurumi
