

Decontamination declaration & sender information form

To be completed by Fuji Electric upon receipt

File (FUJI No.) >

Date of receipt >

In order to protect our staff and facilities, all returned equipment must be completely free of any product residues. Please attach to the equipment this duly completed decontamination declaration, placed in a pouch securely fixed to the outside of the packaging and clearly visible to our staff. Before any unpacking, we will check that this declaration is present.

Furthermore, in the absence of any return or written confirmation within 60 days following the submission of our inspection quotation and/or repair quotation, the customer shall be deemed not to wish to proceed with the inspection and/or repair of the equipment. In this case, either the equipment will be returned at the customer's expense or destroyed in accordance with the applicable environmental regulations. If Fuji Electric France does not receive any response regarding this choice within 30 days following this last proposal, the destruction will be carried out without further notice.
